

PROGRAM DESCRIPTION

There comes a time in the careers of most IT Professionals that they will be appointed to take on a leadership role in their organization. IT professionals get the opportunity to lead since they have shown excellent performance during their role as an individual contributors. Their technical competencies are proven to provide value to their stakeholders. But to lead people they just cannot use these technical competencies. They need leadership competencies that are custom fit the IT field.

The Leadership Essential Training for IT Professional program provides the concepts and the practices of Leadership in a high velocity working environment to help leaders effectively coach, empower and lead individuals and teams to higher levels of performance.
